```

We are specialized in developing custom-tailored software solutions for companies of all sizes and industries. Our team of more than 20 IT engineers and developers has been known for successfully finishing every single project since 1999. What our customers like most about us? The stability and usability of our developed applications.

To strengthen our Banking Product Development Team based at our HQ in Basel, we are looking for a

Full Stack Developer (m/f)

Your tasks

- Develop custom-tailored solutions with agile methods
- Discuss and clarify the requirements with the client and team
- Participate in the software design, contributing your own ideas
- Development both front-end and back-end
- Contribute to the continuous improvement of the way we do things

Your profile

- University Degree in Computer Science, Software Engineering or equivalent
- Profound full-stack Java development know-how and experience
- Comprehensive knowledge and profound experience in Java and established Web technologies (e.g. JavaScript, Angular, Polymer, etc.)
- Solid experience with Spring & Hibernate
- DevOps know-how is an advantage
- Excellent team player combined with great communication skills
- You are working autonomous with great enthusiasm and flexibility

Hierarchies are not important to us. However, performance and professionalism are important. Autonomy has a high priority for us. We maintain a collegial atmosphere. Once a year, we all meet for 3 days to develop our strategy. Twice a year, we come together to develop innovative ideas and to test and try new technologies.

Any interest in joining an agile & dynamic team? Please send us your application by email to hr@canoo.com.
